

HEALTH AND CARE STATISTICS LANDSCAPE FOR ENGLAND

The decentralised nature of health and care system in England means that a number of organisations are involved in the collection of data that underpin official statistics and the publication of a range of outputs.

The English Health Statistics Steering Group have developed a health and social care statistics landscape which provides links to all key official health and social care statistics in a central place. This landscape is intended to help all users find relevant statistics and associated information on specific health topics and cross-cutting themes. Similar information for Wales can be found using the Welsh Government's new [mapping tool](#).

We are currently in the process of developing a more user interactive version of this landscape. If you would like to assist us in reviewing this new tool, please contact us at gss.health@ons.gov.uk
